Do you have any personal or professional interests?

For my personal interests, I like doing some exercises and reading books in my spare time. I will go out for a tour on a long holiday. I like swimming in the sea, boating, climbing, playing golf, etc.

For my professional interests, I like doing some research and reading the research papers in order to keep up with the progression of the medical science.

Please describe your personality/temperament.

I always have a very good temper and manner. I am very polite to others. I always try my best to help my patients and my colleagues. I get along extremely well with my patients and other doctors in the hospital. I take care of those persons around me very well.

I never get serious angry with others because I think that makes nonsense. If I have some complaints on others, I will tell them directly and discuss with them peacefully.

Please describe your attitude/philosophy in life.

I do my utmost to have a healthy and happy life. In my opinion, health and happiness are both important in my life. I have an optimistic attitude toward life, which is essentially important when I am in a difficulty time. I always try my best to manage all the problems in my life and I believe I can do that.

What do you think makes you unique?

I am highly intelligent and very good at learning. In my opinion, it is learning that makes me unique. Intelligence is not enough for me without learning, but it makes me easy to learn.

How would you describe your childhood? And what value were you taught?

I have an exceptionally happy childhood in China. I was born in Jiangsu Province of China, where is a very beautiful and wealthy place. There were many trees around my house. I often played in the shadow of those trees. Besides, I often went to swim in a small river behind my house.

I was taught by my parents and my grandparents that I should show respect and politeness to others. In addition to that, the neighbours should help each other.

Who were the most influential people in your upbringing? And what were they like?

Both my parents are the most influential people in my upbringing. My mother tried her best to take care of me and teach me the basic knowledge in life. My father taught me a lot of mathematics. They taught me how to be a nice person and how to learn in school. So, I have a very good habit in my life. Both of them are the most wonderful person in the world.

Please explain why you wish to become a donor.
It is my honour and my pleasure to help others who cannot get pregnant naturally. On the other hand, I am glad to have more offspring.

Do you have a message for a child conceived from your donation?
Health and happiness are the most crucial things in life. Do exercises often so to keep healthy. Be optimistic in your life. Try your best to learn. Intelligence is not enough. I hope you can be a medical doctor too.

The following is a list of conditions that are known to be genetic or have a genetic contribution meaning that they could be inherited by a donor conceived child. If **you or any member of your family** has been diagnosed as being affected by one of these conditions or as being a carrier of one of these conditions, please tick yes and add the age of onset. If a relative has been affected by the condition, describe the relationship of the person to yourself (i.e. grandparent, parent, sibling, aunt, uncle or cousin). If you would like to provide further information about any condition(s) you indicate as yes, please add this information in the box at the end of this document.
